SUMMARY

Full Stack Developer specializing in (MongoDB, Express.js, React.js, Node.js), hands-on experience in building responsive web applications with dynamic content management and RESTful APIs for real clients. Proficient in building scalable frontend architectures, integrating API's, Git version control and Agile development practices.

EDUCATION

Master of Computer Applications (MCA) – Pursuing (2024 – Expected August 2026)
Ramnath Guljarilal Kedia College of Commerce — Informatics

Bachelor of Computer Applications (BCA) – 2021 – 2024
Omega Degree College — Informatics
CGPA: **8.9**

SKILLS

Programming Languages: JavaScript (ES6+)

Frontend Technologies: HTML5, CSS3, React.js, Bootstrap, Material UI, Tailwind CSS

Backend Technologies: Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Vercel, Postman

Concepts: RESTful API Development, CRUD Operations, MVC Architecture, Authentication & Authorization, Responsive Design, API Integration, Agile Methodology

TECHNICAL PROJECT

AI Career Platform (MERN + GenAI) - March 2026

- Developed a **full-stack AI-powered career platform** enabling users to generate resumes, prepare for interviews, and analyze job compatibility
- Built a responsive frontend using React.js and Material UI with modular and reusable components
- Designed and implemented **RESTful backend APIs** using Node.js and Express.js following MVC architecture
- Integrated **Google Gemini AI API** to power intelligent features including resume generation, interview question generation, and job match analysis
- Implemented **secure authentication and authorization** using JWT and bcrypt with protected routes
- Developed **Job Match Analyzer** to evaluate resume against job descriptions and provide skill gap insights and ATS optimization suggestions
- Created **dashboard system** to display user activity, analytics, and recent AI interactions

- Used **MongoDB with Mongoose** to store user data and AI-generated history with optimized queries
- Integrated frontend and backend using Axios with proper error handling and API management
- Improved maintainability using modular folder structure, reusable components, and centralized error handling
- Tested APIs using **Postman** and validated full end-to-end functionality

FREELANCE EXPERIENCE

Sapthagiri Enterprises – Business Website - July 2025

- Developed a responsive business website using React.js and Material UI based on client requirements.
- Designed a modern UI using Material UI, resulting in a 20% increase in user session duration and improved mobile responsiveness.
- Implemented functional contact form with validation and email handling.
- Delivered project within deadline and ensured cross-device compatibility.

Educare EM School – School Website - Sept 2024

- Built a responsive website using HTML, CSS, and JavaScript for a real client.
- Developed a CMS-based image management system allowing the client to update website images without coding.
- Implemented dynamic image upload functionality with structured content handling.
- Integrated inquiry contact form for communication management.

DECLARATION

Actively seeking Full Stack Developer opportunities where I can contribute to building scalable and AI-driven web applications.
